Experiences with co-financing of RES projects supported for EU funds.

13:30 Discussion;

14:00 End.

Minutes:

“Regional Energy Conception for district of Veľký Krtíš” as comprehensive document in Slovak language analyzing current situation in energy sector of E4C target region, analyzing potential for energy savings and RES utilisation, as well as presenting potential pilot projects of biomass and biogas utilisation has been presented by Mr. Igor Iliáš from Energy Centre Bratislava. Local stakeholders have time to amend the document till 22.6.2007. After then final version of conception will be public available on ECB web page and presented to Banská Bystrica Self-Governing Region. Shorten English version of Slovak conception is called “Master Plan” as the deliverable of E4C project and will be published on project web-site www.e4c.org.

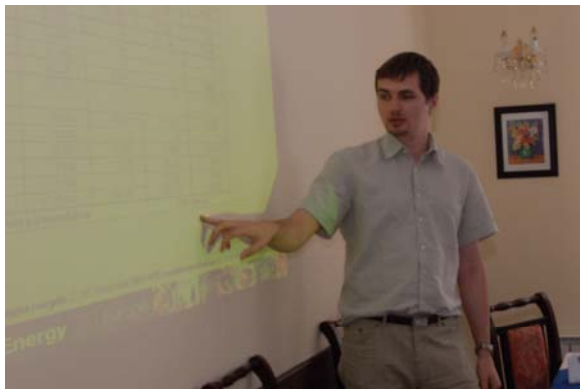

Second speaker, Mr. Hollan from Centre for Public Lighting has presented activities of centre in the field of energy saving in public lightning and auditing of systems in municipalities.

Speakers of the B session presented current status of EU funds support programmes preparation in Slovakia. Another public support programmes to the projects of energy savings or RES utilisation have been presented as well. The last session was focused on commercial financing of the projects.

Participants confirmed by the signature of the attendance list receiving of E4C publication “Renewable Energy and Energy Efficiency projects within Structural Funds in the context of the Lisbon Agenda” with Slovak translation of the abstract included.
